

INSTALLATION INSTRUCTIONS

Part Number: VF5000

This filter fits: SEE CATALOG FOR CURRENT APPLICATIONS

* FREE K&N® decal To register your warranty, please see us online at knfilters.com/register. FREE K&N® decal *

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Locate the cabin filter door underneath the passenger side dashboard.
2. Release tabs to allow cabin door to open. (Fig. 2 & Fig. 3)
3. Remove dirty cabin filter. (Fig.3 & Fig. 4)
NOTE: Remove any debris that might be present inside the cabin filter housing.
4. Install K&N® cabin filter by placing one end of the filter in the box first then follow the tracks by sliding the filter upward. (Fig. 5 & Fig.6)
NOTE: Cabin Filter can only be installed one way. At first arrows will be pointing down but as the filter slides in arrows will be facing up. Filter might not fit completely if it falls off the track.
5. Close door on air box to complete cabin filter installation. With the cabin filter installed, clean an area on the housing and apply K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
